GACRC Sapelo2 Cluster New User Training

Georgia Advanced Computing Resource Center (GACRC)
Enterprise Information Technology Services (EITS)
The University of Georgia
Outline

- GACRC

- Sapelo2 Cluster
  - Cluster Diagram and Overview
  - Five Directories
  - Four Computational Partitions
  - Software Environment

- Batch Job Submission Workflow

- Useful Commands: scontrol show job, seff, sacct-gacrc, sinfo-gacrc, qlogin

- GACRC Wiki and User Support

- Appendices
GACRC

- A high-performance-computing (HPC) center at the UGA
- Provide to the UGA research and education community an advanced computing environment:
  - HPC computing and networking infrastructure located at the Boyd Data Center
  - Comprehensive collection of scientific, engineering and business applications
  - Consulting and training services

Wiki: http://wiki.gacrc.uga.edu
Help and Support: https://wiki.gacrc.uga.edu/wiki/Getting_Help
Web Site: http://gacrc.uga.edu
Note: You need to connect to the UGA network using VPN when accessing from outside of the UGA main campus. UGA VPN: [https://eits.uga.edu/access_and_security/infosec/tools/vpn/](https://eits.uga.edu/access_and_security/infosec/tools/vpn/)
Overview

- Two nodes, your "username" is your MyID for both of them:
  1. For batch job workflow, the host to log into is sap2test.gacrc.uga.edu (After Oct. 24th, it will be sapelo2.gacrc.uga.edu)
  2. For file transfers, the host to log into is xfer.gacrc.uga.edu

- Five Directories:
  1. **Home**: Login landing spot; 200GB quota; Backed-up
  2. **Scratch**: High-speed FS for *temp files* needed for *current jobs*; NO quota; NOT backed-up; 30-day purge
  3. **Work**: High-speed FS for *input files* needed for *repeated jobs*; per group quota of 500GB and max 100,000 single files; NOT backed-up
  4. **Project**: Temporary data parking; per group quota of 1TB; Backed-up (ONLY accessible from Transfer node!)
  5. **Local Scratch**: Local storage on each individual compute node; 200-800GB quota; NOT backed-up

- Five Computational Partitions: batch, highmem_p, gpu_p, inter_p, groupBuyin_p
## Five Directories

[https://wiki.gacrc.uga.edu/wiki/Disk_Storage](https://wiki.gacrc.uga.edu/wiki/Disk_Storage)

<table>
<thead>
<tr>
<th>Directory</th>
<th>Name</th>
<th>Quota</th>

</tbody>
</table>
Accessing Directories from Nodes

- `/home/MyID`
- `/scratch/MyID`
- `/work/abclab`

Please Note:
Local scratch is accessible on each individual compute node; it is not shown here.
More about scratch file system "30-day purge" policy

https://wiki.gacrc.uga.edu/wiki/Disk_Storage#Scratch_file_system

Any file that is not accessed or modified by a compute job in a time period no longer than 30 days will be automatically deleted off the /scratch file system.

Measures circumventing this policy will be monitored and actively discouraged.

- You have a list of those purgeable files located at /usr/local/var/lustre_stats/$USER.over30d.files.lst
- You are suggested to copy files from /scratch to /project or outside of GACRC
- You should first move all unnecessary files and folders to /scratch/trash/$USER
- The fastest way to save old files is to copy them to /project area, using the fpsync utility on xfer.gacrc.uga.edu
- When you archive data using tar on /scratch, please do not use z option (compression option). After you achieved data by tar, you can use gzip to compress it.
Please note, after **Oct. 24th**, there will be a lot more nodes added to batch, highmem_p, and gpu_p.

<table>

</tbody>
</table>
Software Environment
https://wiki.gacrc.uga.edu/wiki/Software_on_sap2test

• More than 650 software modules are installed (as of Oct. 2020)
• Most modules are compiled EasyBuild (EB) toolchains GCC-8.3.0 or foss-2019b.
• Name format: Name/Version-Toolchain, e.g., Python/3.8.2-GCCcore-8.3.0 (case-sensitive)
• Module commands:
  ➢ ml spider pattern : Search module names matching a pattern
  ➢ ml moduleName : Load a module into your working environment
  ➢ ml av : List all available software modules installed on cluster
  ➢ ml : List modules currently loaded
  ➢ ml -moduleName : Remove a module from working environment
• Installation path of 3 kinds of Software on Sap2test:

  ➢ `/apps/eb` : Software built by EasyBuild, e.g., RepeatModeler/2.0.1-foss-2019b, TensorFlow/2.2.0-fosscuda-2019b-Python-3.7.4

  ➢ `/apps/gb` : Software built out of EasyBuild (no EB toolchain in software name), e.g., ansys/19.2, matlab/R2019b, CellProfiler/4.0.0rc5_pyenv

  ➢ `/apps/singularity-images` : Singularity container, e.g., busco-4.0.5.simg, repeatmodeler-2.0.1.simg, trinity-2.8.5.simg

• Once software is loaded, its installation path is stored in `EBROOTAPPNAME`, where `APPNAME` needs to be replaced by the actual software name (all capital letters), for example,

```bash
zhuofei@b1-1 ~$ ml TensorFlow/2.2.0-fosscuda-2019b-Python-3.7.4
zhuofei@b1-1 ~$ echo $EBROOTTENSORFLOW
/apps/eb/TensorFlow/2.2.0-fosscuda-2019b-Python-3.7.4
```
Important Tip using Software

• When you load more than one software modules, toolchain compatibility is the most important thing you need to pay attention to

• Toolchain in included as a part of software name, if the software is built by Easybuild

• If you load more than one module and some toolchains are incompatible, you will end up with failing dependencies or Lmod errors, like this:

  Lmod has detected the following error:  
  These module(s) exist but cannot be loaded as requested

• https://wiki.gacrc.uga.edu/wiki/Available_Toolchains_and_Toolchain_Compatibility
1. Log on to Login node using MyID and password, and two-factor authentication with Archpass Duo:
   ```
   ssh MyID@sap2test.gacrc.uga.edu
   ```
2. On Login node, change directory to your `scratch` space:
   ```
   cd /scratch/MyID
   ```
3. Create a working subdirectory for a job:
   ```
   mkdir ./workDir
   ```
4. Change directory to `workDir`:
   ```
   cd ./workDir
   ```
5. Transfer data from local computer to `workDir`:
   Use `scp` or `SSH File Transfer` to connect Transfer node
   Transfer data on cluster to `workDir`:
   Log on to Transfer node and then use `cp` or `mv`
6. Make a job submission script in `workDir`:
   ```
   nano ./sub.sh
   ```
7. Submit a job from `workDir`:
   ```
   sbatch ./sub.sh
   ```
8. Check job status:
   ```
   squeue --me
   ```
   or Cancel a job:
   ```
   scancel jobID
   ```
Step 1: Log on to Login node - Mac/Linux using ssh
https://wiki.gacrc.uga.edu/wiki/Connecting_to_the_Slurm_test_cluster

1. Open **Terminal** utility

2. Type command line: `ssh MyID@sap2test.gacrc.uga.edu`

3. You will be prompted for your **MyID password**

4. Sapelo2 access requires ID verification using two-factor authentication with Archpass Duo. If you are not enrolled in Archpass Duo, please refer to

   [https://eits.uga.edu/access_and_security/infosec/tools/archpass_duo/](https://eits.uga.edu/access_and_security/infosec/tools/archpass_duo/) on how to enroll
Step1 (Cont.) - Mac/Linux using ssh

Use Terminal utility on Mac or Linux!

```
[zhuofei@localhost ~]$ ssh zhuofei@sap2test.gacrc.uga.edu
Password: ➜ Input MyID password!

Enter a passcode or select one of the following options:
1. Duo Push to XXX-XXX-5758
2. Phone call to XXX-XXX-5758
3. Phone call to XXX-XXX-1925
4. SMS passcodes to XXX-XXX-5758

Passcode or option (1-5): 1 ➜ Select Duo authentication option!
Success. Logging you in...
Last login: Tue Sep 15 11:22:42 2020 from 128.192.75.65
```

```
zhuofei@ss-sub1 ~$ ➜ I am on login node ss-sub1!
```

Log on
Step1 (Cont.) - Windows using SSH Secure Utilities

1. Download and install SSH Secure Utilities: [http://eits.uga.edu/hardware_and_software/software/](http://eits.uga.edu/hardware_and_software/software/)

2. You can use PuTTY as an alternative: [https://www.putty.org/](https://www.putty.org/)
Step 1 (Cont.) - Windows using SSH Secure Utilities

Please Note:
Authentication Method needs to be set as
Keyboard Interactive in default <profile Setting>
Step 1 (Cont.) - Windows using SSH Secure Utilities

Host Name: sap2test.gacrc.uga.edu
User Name: MyID
Port Number: 22

8. Enter your UGA MyID password and click OK
Step 1 (Cont.) - Windows using SSH Secure Utilities

9. Enter “push” and click OK

10. Verify login using Duo, then you will log on!
Step2: On Login node change directory to global scratch

• Once you logged on, your current directory will be your **home directory**

```bash
zhuofei@ss-sub1 ~$ pwd
/home/zhuofei
```

**this is my home directory!**

• Use `cd` command to change your current directory to `/scratch/MyID`

```bash
zhuofei@ss-sub1 ~$ cd /scratch/zhuofei/
zhuofei@ss-sub1 zhuofei$ pwd
scratch/zhuofei
```

**this is my scratch space!**

• Use `ls` command to take a look in `/scratch/MyID`

```bash
zhuofei@ss-sub1 zhuofei$ ls
user_test
```

Step 3 - 4: Create and cd to a working subdirectory

- Use `mkdir` command to make a subdirectory in `/scratch/MyID`

  ```
  zhuofei@ss-sub1 zhuofei$ mkdir workDir
  zhuofei@ss-sub1 zhuofei$ ls
  user_test workDir
  ```

- Use `cd` command to change your current directory to `/scratch/MyID/workDir`

  ```
  zhuofei@ss-sub1 zhuofei$ cd workDir
  zhuofei@ss-sub1 workDir$ pwd
  /scratch/zhuofei/workDir
  zhuofei@ss-sub1 workDir$ ls
  ← it is empty!
  ```
Step 5: Transfer data from local computer to workDir - Mac/Linux
https://wiki.gacrc.uga.edu/wiki/Transferring_Files

1. You need to connect to cluster’s Transfer node (xfer.gacrc.uga.edu)
2. Open Terminal utility on local computer to use scp (-r) [Source] [Target]

*E.g. 1:* working on local computer, from Local ➔ workDir on cluster

```
scp ./file zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/
scp -r ./folder/ zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/
```

*E.g. 2:* working on local computer, from workDir on cluster ➔ Local

```
scp zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/file.
scp -r zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/folder/.
```
Step 5 (Cont.) - Windows using SSH Secure Utilities

1. You need to connect to cluster’s **Transfer node** (xfer.gacrc.uga.edu)

2. Use **SSH File Transfer** on **local computer** (alternative FileZilla or WinSCP)

3. Steps 1-10 are the same as steps on page 14-15, except for **Host Name** in step 5:

   Host Name: xfer.gacrc.uga.edu

4. Once you log on, use File Transfer of SSH Secure Utilities, as shown on next page
Step5 (Cont.) - Windows using SSH Secure Utilities

1. Click to open File Transfer

2. Change local and remote paths

3. Drag data between local computer and remote Transfer node
Step5 (Cont.): Transfer data on cluster to workDir

• Log on to Transfer node (xfer.gacrc.uga.edu)
  ✓ Mac/Linux: ssh MyID@xfer.gacrc.uga.edu (page 12)
  ✓ Windows: use SSH Secure Utilities (page 19)

• Landing folder: /home/MyID (Home)

• You can transfer data between following directories on cluster using `cp` or `mv`:
  1. /home/MyID (Home)
  2. /scratch/MyID (Scratch)
  3. /work/abclab (Work)
  4. /project/abclab (Project)

• Most file systems on Transfer are *auto-mounted* upon *the first time full-path access*, e.g.,
cd /project/abclab/
Step 6: Make a job submission script in workDir

https://wiki.gacrc.uga.edu/wiki/Sample_batch_job_submission_scripts_on_the_Slurm_test_cluster

$ nano sub.sh

Ctrl-x to save file and quit from nano

nano is a small and friendly text editor on Linux.
To run demo example, please copy 3 files into your current working dir:

```
cp /usr/local/training/sub.sh .
cp /usr/local/training/myreads.fq .
cp -r /usr/local/training/index .
```
Step 7: Submit a job from workDir using `sbatch`

https://wiki.gacrc.uga.edu/wiki/Running_Jobs_on_Sap2test#How_to_submit_a_job_to_the_batch_queue

```
zhuofei@ss-sub1 workDir$ pwd
/scratch/zhuofei/workDir
zhuofei@ss-sub1 workDir$ ls
index  myreads.fq  sub.sh
zhuofei@ss-sub1 workDir$ sbatch sub.sh
Submitted batch job 32860
```

`sub.sh` is a job submission script to

1. specify computing resources:
2. load software using `module load`
3. run any Linux commands you want to run
4. run the software
Step8: Check job status using `squeue --me`
https://wiki.gacrc.uga.edu/wiki/Monitoring_Jobs_on_Sap2test

```
  zhuofei@ss-sub1 workDir$  squeue --me
  JOBID PARTITION   NAME     USER ST TIME NODES NODELIST(REASON)
  32862 batch testBowt zhuofei PD 0:00  1    (None)
  32861 batch testBowt zhuofei R  0:05  1    c5-19
  32860 batch testBowt zhuofei R  4:37  1    c5-19
  32859 batch testBowt zhuofei CD 9:29  1    b1-2
```

R : job is Running
PD : job is Pending, waiting for resources to become available
CD : job is Completed and is not longer running
CA : job is Canceled and is not longer running
F : job is Failed (crashed) on the node and is not longer running

Note: “TIME” is the **elapsed wall-clock time** of your job running on cluster, instead of the CPU time.
Step 8: Check job status using `squeue --me -l`

https://wiki.gacrc.uga.edu/wiki/Monitoring_Jobs_on_Sap2test

```
Tue Sep 15 15:00:51 2020

<table>

Obtain Job Details

https://wiki.gacrc.uga.edu/wiki/Monitoring_Jobs_on_Sap2test#How_to_see_detailed_information_about_a_given_job

Option 1: `scontrol show job JobID` for details of a running job

Option 2: `seff` for details of computing resource usage of a finished job

Option 3: `sacct-gacrc` for details of computing resource usage of a running or finished job

Option 4: Email notification from finished jobs (completed, canceled, or crashed), if using:

```
#SBATCH --mail-user=username@uga.edu
#SBATCH --mail-type=END,FAIL
```
## Interactive jobs

GACRC Help and Support
https://wiki.gacrc.uga.edu/wiki/Getting_Help

➢ **Job Troubleshooting:**

Please tell us details of your question or problem, including but not limited to:

- Your user name
- Your job ID
- Your working directory
- The queue name and command you used to submit the job

➢ **Software Installation:**

- Specific name and version of the software
- Download website
- Supporting package information if have

When you ask GACRC to test or troubleshoot your jobs, Please make sure of the correctness of your datasets being used!
GACRC Service Catalog

Services (11)

Account Creation
For a research group's PI to request user accounts for group members on the GACRC computing systems.

Class Account Creation
For an instructor to request user accounts for students attending a course that will need to use GACRC computing systems.

Class Account Modification
For instructors to request changes to be made in previously requested class account.

Computing Lab Modification/Deletion

General Internal

General Support
Report issues and request help with GACRC systems, except for software installation requests and account/lab creation requests.

Lab Creation
For a research group's PI to register a computing lab on the GACRC computing systems

Modify/Delete Account
For PIs to request changes in or deletion of user accounts on GACRC computing systems.

Software Installation/Update
Request software and common application database (e.g. NCBI blast databases) installation and upgrade.

My Recent Requests

- GACRC Sapele2 New Lab/Use Account Request 2018-11-14_preTraining
- GACRC Sapele2 Cluster New Lab/Use Account Request 2018-11-05_preTraining
- provision 5 user accounts for ugahebedesk group
- GACRC Sapele2 New Lab/Use Account Request 2018-10-22_preTraining

General Support

If you do not have a myID, please mail gacrc.help@uga.edu, and we will respond promptly.

The purpose of this form is to provide a method to report issues and to request help with GACRC systems.

Please use this form for all questions and support needs (e.g. to report issues, to troubleshoot jobs, to request resources or granting help, etc.). Please do not use this form for software installation requests or lab/user account management, which all have separate brm's.

Please refer to the GACRC documentation for information on GACRC resources, how to connect and transfer files, how to run jobs, installed software list, training schedule, and a FAQ.

The link to this documentation is https://wiki.gacrc.uga.edu

This site is operated by Enterprise Information Technology Services (ETS) at the University of Georgia.

```

MIGRATING TO SLURM AND NEW SOFTWARE ENVIRONMENT
Guideline Tips

• Do NOT use Login node to run CPU/memory intensive tasks directly ➔ submit job to queue!
• Do NOT use Login Node to transfer data between your local computer and cluster ➔ use Transfer node!
• Do NOT use Home for storing job data ➔ use /scratch/MyID
• Do NOT park data in Scratch or Local Scratch ➔ clean up when job finishes or exits from node
• Do NOT park data permanently in Project ➔ download data to your local drive
• NO large memory job running on batch partition ➔ use highmem_p
• NO small memory job running on highmem_p partition ➔ use batch
• In general, number of threads you want to run with a parallel job = number of cores requested
• When you archive data using tar on /scratch, please do not use z option (compression option). After you achieved data by tar, you can use gzip to compress it.
Practical Tips

• Each directory should not have too many files inside! A rule of thumb would be to try to keep no more than a few tens of thousands of files (<10000 would be even better) in any single directory which is accessed frequently.
Thank You!
