

# GACRC Sapelo2 Cluster New User Training

Georgia Advanced Computing Resource Center (GACRC)

Enterprise Information Technology Services(EITS)

The University of Georgia

## Outline

- GACRC
- Sapelo2 Cluster
  - Cluster Diagram and Overview
  - Five Directories
  - Five Computational Partitions
  - Software Environment
- Batch Job Submission Workflow
- Useful Commands: squeue --me, sacct, sacct-gacrc, qlogin
- GACRC Wiki and User Support
- Appendices

#### GACRC

- A high-performance-computing (HPC) center at the UGA
- Provide to the UGA research and education community an advanced computing environment:
  - HPC computing and networking infrastructure located at the Boyd Data Center
  - Comprehensive collection of scientific, engineering and business applications
  - Consulting and training services

#### Wiki: http://wiki.gacrc.uga.edu

Help and Support: https://wiki.gacrc.uga.edu/wiki/Getting Help

Web Site: <u>http://gacrc.uga.edu</u>

Kaltura Channel: <u>https://kaltura.uga.edu/channel/GACRC/176125031</u>

#### Sapelo2 Cluster

**Note**: You need to connect to the UGA network using VPN when accessing from outside of the UGA main campus. UGA VPN: <u>https://eits.uga.edu/access\_and\_security/infosec/tools/vpn/</u>

## Five Directories <a href="https://wiki.gacrc.uga.edu/wiki/Disk\_Storage">https://wiki.gacrc.uga.edu/wiki/Disk\_Storage</a>

| Directory       | Name             | Quota              | Accessible<br>from           | Intended Use   | Backed-<br>up | Important Notes  |
|-----------------|------------------|--------------------|------------------------------|--|---------------|--|
| /home/MyID      | Home             | 200GB              | Login<br>Transfer<br>Compute | Static data, e.g.<br>1. Scripts, source codes<br>2. Local software | Yes           | Not for storing data of your jobs!                                   |
| /scratch/MyID   | Scratch          | No Limit           | Login<br>Transfer<br>Compute | Temporary files needed for currently running jobs                  | No            | Clean up when your job finishes!<br>Subject to "30-day purge" policy |
| /work/abclab    | Work             | 500GB<br>10⁵ files | Login<br>Transfer<br>Compute | Input files needed for repeated jobs                               | No            | Clean up when your job finishes!<br>Group sharing is possible        |
| /project/abclab | Project          | 1TB<br>(initial)   | Transfer                     | Temporary data parking   | Yes           | Group sharing is possible  |
| /lscratch       | Local<br>Scratch | 200GB -<br>800GB   | Compute                      | Jobs with heavy disk I/O operations                                | No            | Clean up when job exits from node!                                   |

#### Scratch File System 30-Day Purge Policy https://wiki.gacrc.uga.edu/wiki/Disk Storage#Scratch file system

Any file that is not accessed or modified by a compute job in a time period **no longer than 30 days** will be automatically deleted off the /scratch file system. Measures circumventing this policy will be monitored and actively discouraged.

- > You have a list of those purgeable files located at /usr/local/var/lustre\_stats/\$USER.over30d.files.lst
- > You are suggested to copy files from your /scratch directory to /project or outside of GACRC
- > To get rid of files in your /scratch directory that you no longer need, move them to /scratch/trash/\$USER
- > The fastest way to save old files is to copy them to /project area, using the fpsync utility on xfer.gacrc.uga.edu
- > When you archive data using tar on /scratch, please do not use z option (compression option). After you archived data by tar, you can use gzip to compress it.

## **Computational Partitions**

Compute nodes are divided into groups called **partitions**. A **partition** is a collection of compute nodes for a particular computing need.

#### Computational Partitions <u>https://wiki.gacrc.uga.edu/wiki/Job\_Submission\_partitions\_on\_Sapelo2</u> <u>https://wiki.gacrc.uga.edu/wiki/Systems#Sapelo2</u>

| Туре        | Partition     | Time<br>limit | Max jobs<br>Running   | Max jobs<br>Submit | Notes   |  |  |
|-------------|---------------|---------------|-----------------------|--------------------|---|--|--|
|             | batch         |               | 250                   | 10,000             | Regular nodes   |  |  |
| Regular     | highmem_p     | 7 days        | 15                    | 100                | For running high memory jobs  |  |  |
| gpu_p       | gpu_p         |               | 18 20 For running GPU |                    | For running GPU-enabled jobs  |  |  |
|             | batch_30d     |               |                       |                    |   |  |  |
| Long-term   | highmem_30d_p | 30 days       | days 1                | 2                  | 30-day partition counterparts   |  |  |
|             | gpu_30d_p     |               | 2                     |                    |   |  |  |
| Interactive | inter_p       | 2 days        | 3                     | 20                 | Regular nodes, for interactive jobs.  |  |  |
| Buy-in      | name_p        |               | variable              |                    | Partitions that target different groups' buy-in nodes. The name string is specific to each group. |  |  |

| Partition                  | Total<br>Nodes            | Max Mem(GB)<br>/Single-node job | Cores<br>/Node | Processor Type       | GPU Cards<br>/Node |     |     |     |     |     |  |    |          |
|----------------------------|---------------------------|---------------------------------|----------------|----------------------|--------------------|-----|-----|-----|-----|-----|--|----|----------|
|                            |                           |                                 | 64             |                      |                    |     |     |     |     |     |  |    |          |
|                            |                           | 120                             | 32             | AIVIDEPTC            |                    |     |     |     |     |     |  |    |          |
| batch<br>batch_30d         | ~275                      | 120                             | 48             | AMD Opteron          | N/A                |     |     |     |     |     |  |    |          |
|                            |                           | 180                             | 32             | Intel Xeon Skylake   |                    |     |     |     |     |     |  |    |          |
|                            |                           | 58                              | 28             | Intel Xeon Broadwell |                    |     |     |     |     |     |  |    |          |
|                            | highmem_p<br>ighmem_30d_p | 500                             | 32             | AMD EPYC             |                    |     |     |     |     |     |  |    |          |
|                            |                           | 500                             | 48             | AMD Opteron          |                    |     |     |     |     |     |  |    |          |
| highmem_p<br>highmem_30d_p |                           | ~30                             | ~30            | ~30                  | ~30                | ~30 | ~30 | ~30 | ~30 | ~30 |  | 64 | AMD EPYC |
| <u></u>                    |                           | 990                             | 28             | Intel Xeon Broadwell |                    |     |     |     |     |     |  |    |          |
|                            |                           |                                 | 48             | AMD Opteron          |                    |     |     |     |     |     |  |    |          |
|                            |                           | 180                             | 32             | Intel Xeon Skylake   | 1 NVDIA P100       |     |     |     |     |     |  |    |          |
| gpu_p<br>gpu_30d_p         | ~10                       | 120                             | 16             | 16                   |                    |     |     |     |     |     |  |    |          |
|                            |                           | 90                              | 12             | Inter Xeon           | 7 NVIDIA<br>K20Xm  |     |     |     |     |     |  |    |          |
| name p                     | variable                  |                                 |                |                      |                    |     |     |     |     |     |  |    |          |

## Software Environment

https://wiki.gacrc.uga.edu/wiki/Software

- Approximately 900 software modules are installed (as of March 2021)
- Most modules are compiled EasyBuild (EB) toolchains GCC-8.3.0 or foss-2019b.
- Name format: Name/Version-Toolchain, e.g., Python/3.8.2-GCCcore-8.3.0 (case-sensitive)
- Module commands:
  - > ml spider *pattern* : Search module names matching a *pattern*
  - ml moduleName : Load a module into your working environment
    - DO NOT LOAD/USE MODULES ON THE LOGIN/SUBMIT NODES! (ss-sub1, ss-sub2, ss-sub3, etc...)
  - ml av : List all available software modules installed on cluster
  - ml : List modules currently loaded
  - ml -moduleName : Remove a module from working environment
  - ml purge : Remove all modules from working environment

# Important Tip using Software

https://wiki.gacrc.uga.edu/wiki/Available\_Toolchains\_and\_Toolchain\_Compatibility

- When you load more than one software modules, toolchain compatibility is the most important thing you need to pay attention to
- If you load more than one module and some toolchains are incompatible, your job will end up with failing dependencies or Lmod errors, such as:

Lmod has detected the following error:

These module(s) exist but cannot be loaded as requested

ml Python/3.7.4-GCCcore-8.3.0 ml Perl/5.28.0-GCCcore-7.3.0

ml Python/3.7.4-GCCcore-8.3.0 ml Perl/5.30.0-GCCcore-8.3.0

ml Beast/2.6.3-foss-2019b ml Perl/5.28.0-GCCcore-7.3.0

ml Beast/2.6.3-foss-2019b ml Perl/5.30.0-GCCcore-8.3.0

## Job Submission Workflow

https://wiki.gacrc.uga.edu/wiki/Running Jobs on Sapelo2

- 1. Log on to Login node using MyID and password, and two-factor authentication with Archpass Duo: ssh MyID@sapelo2.gacrc.uga.edu
- 2. On Login node, change directory to your <u>scratch</u> space: cd /scratch/MyID
- 3. Create a working subdirectory for a job : mkdir ./workDir
- 4. Change directory to <u>workDir</u> : cd ./workDir
- 5. Transfer data from local computer to <u>workDir</u> : use scp or WinSCP to connect Transfer node Transfer data on cluster to <u>workDir</u> : log on to Transfer node and then use cp or mv
- 6. Make a job submission script in <u>workDir</u> : nano ./sub.sh
- 7. Submit a job from <a href="http://workDir.sbatch">workDir</a> : <a href="http://workDir.sbatch">sub.sh</a>
- 8. Check job status : squeue --me or Cancel a job : scancel job ID

#### Step1: Log on to Login node - Mac/Linux using ssh https://wiki.gacrc.uga.edu/wiki/Connecting

- 1. Open Terminal utility
- 2. Type command line: ssh MyID@sapelo2.gacrc.uga.edu
- 3. You will be prompted for your MyID password
- 4. Sapelo2 access requires ID verification using two-factor authentication with Archpass

Duo. If you are not enrolled in Archpass Duo, please refer to

https://eits.uga.edu/access\_and\_security/infosec/tools/archpass\_duo/ on how to enroll

#### Step1 (Cont.) - Mac/Linux using ssh

#### Use Terminal utility on Mac or Linux!

Enter a passcode or select one of the following options:

- 1. Duo Push to XXX-XXX-5758
- 2. Phone call to XXX-XXX-5758
- 3. Phone call to XXX-XXX-1925
- 4. SMS passcodes to XXX-XXX-5758

Passcode or option (1-5): 1 Success. Logging you in... Last login: Tue Sep 15 11:22:42 2020 from 128.192.75.65

zhuofei@ss-sub1 ~\$

← I am on login node ss-sub1!

#### Step1 (Cont.) - Windows using PuTTY

- 1. Download and install PuTTY: <u>https://www.putty.org/</u>
- 2. Detailed downloading and installation instructions:

https://wiki.gacrc.uga.edu/wiki/How\_to\_Install\_and\_Configure\_PuTTY

3. Detailed configuring and usage instructions:

https://wiki.gacrc.uga.edu/wiki/How\_to\_Install\_and\_Configure\_PuTTY#Configuring\_PuTTY

#### Step1 (Cont.) - Windows using PuTTY

The first time you connect to login node, PuTTY will give you this security alert window. Please click "Yes"

#### Next you will enter your UGA MyID password and initiate DUO authentication procedure:

| 🖉 sapelo2.gacrc.uga.edu - PuTTY —   | Х | -<br>Bester sapelo2.gacrc.uga.edu - PuTTY  |  |
|---|---|--|--|
| B Using username "bc06026".<br>Keyboard-interactive authentication prompts from server:   |   | <pre>  requires a password (one factor) and a code, phone,<br/>  or device (second factor) to successfully authenticate.</pre>   |  |
| <br>  UGA DUO authentication is required for SSH/SCP access to<br>  GACRC systems.<br>  |   | <pre>I If you are not enrolled in the UGA DUO service please   visit the UGA DUO service self-service portal to enroll   and configure or manage your DUO enabled devices.</pre>                           |  |
| ,<br>  UGA DUO is a two-factor authentication service which<br>  requires a password (one factor) and a code, phone,<br>  or device (second factor) to successfully authenticate. |   | <pre>    https://eits.uga.edu/access_and_security/infosec/tools/duo/portal/  </pre>  |  |
| <br>  If you are not enrolled in the UGA DUO service please<br>  visit the UGA DUO service self-service portal to enroll<br>  and configure or manage your DUO enabled devices.   |   | <pre>  For additional help with UGA DUO authentication or to   report an issue please visit:     https://eits.uga.edu/access_and_security/infosec/tools/archpass/   Duo two-factor login for zbuofei</pre> |  |
| <br>  https://eits.uga.edu/access_and_security/infosec/tools/duo/portal/<br>  |   | <br>  Enter a passcode or select one of the following options:   |  |
| For additional help with UGA DUO authentication or to<br>  report an issue please visit:  |   | <pre>1 J. Duo Push to XXX-XXX-5758 2 Phone call to XXX-XXX-5758</pre>  |  |
| <br>  https://eits.uga.edu/access_and_security/infosec/tools/archpass/<br>  |   | <pre>3. Phone call to XXX-XXX-1925 4. Phone call to XXX-XXX-3535</pre>   |  |
| Password: UGA MyID password   |   | 5. SMS passcodes to XXX-XXX-5758   |  |

## Step2: On Login node change directory to global scratch

• Once you logged on, your current directory will be your <u>home directory</u>

• Use cd command to change your current directory to <u>/scratch/MyID</u>

zhuofei@ss-sub1 ~\$ cd /scratch/zhuofei/ zhuofei@ss-sub1 zhuofei\$ pwd /scratch/zhuofei

this is my scratch space!

• Use ls command to take a look in /scratch/MyID

zhuofei@ss-sub1 zhuofei\$ ls user\_test

#### Step3 - 4: Create and cd to a working subdirectory

• Use mkdir command to make a subdirectory in /scratch/MyID

zhuofei@ss-sub1 zhuofei\$ mkdir workDir zhuofei@ss-sub1 zhuofei\$ ls user\_test workDir

• Use cd command to change your current directory to /scratch/MyID/workDir

zhuofei@ss-sub1 zhuofei\$ cd workDir zhuofei@ss-sub1 workDir\$ pwd /scratch/zhuofei/workDir zhuofei@ss-sub1 workDir\$ ls

# Step5: Transfer data from local computer to workDir - Mac/Linux <a href="https://wiki.gacrc.uga.edu/wiki/Transferring\_Files#Using\_scp">https://wiki.gacrc.uga.edu/wiki/Transferring\_Files#Using\_scp</a>

- 1. You need to connect to cluster's <u>Transfer node</u> (xfer.gacrc.uga.edu)
- 2. Open Terminal utility on local computer to use scp (-r) [Source] [Target]

*E.g. 1*: working on local computer, from Local  $\rightarrow$  workDir on cluster

scp ./file zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/

scp -r ./folder/ zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/

*E.g. 2*: working on local computer, from workDir on cluster  $\rightarrow$  Local

scp zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/file .

scp -r zhuofei@xfer.gacrc.uga.edu:/scratch/zhuofei/workDir/folder/ .

# Step5 (Cont.) - Windows using WinSCP <a href="https://wiki.gacrc.uga.edu/wiki/Transferring\_Files#Using\_WinSCP">https://wiki.gacrc.uga.edu/wiki/Transferring\_Files#Using\_WinSCP</a>

- 1. You need to connect to cluster's <u>Transfer node</u> (xfer.gacrc.uga.edu)
- 2. Use WinSCP on local computer
  - WinSCP can be downloaded from <a href="https://winscp.net/eng/index.php">https://winscp.net/eng/index.php</a>
  - Default installation procedure is simple
- 3. Alternative FileZilla <u>https://wiki.gacrc.uga.edu/wiki/Transferring\_Files#Using\_FileZilla</u>

## Step5 (Cont.) - Windows using WinSCP

https://wiki.gacrc.uga.edu/wiki/Transferring Files#Using WinSCP

## Step5 (Cont.) - Windows using WinSCP

https://wiki.gacrc.uga.edu/wiki/Transferring\_Files#Using\_WinSCP

| 💑 zhuofei@xfer.gacrc.uga.edu - WinSCP 📃 🖾             |          |                  |  |  |                                  |    |            |        |        |       |  |

|                       |                               |                           |                             |             |                    |                |                |   |

#### Step5 (Cont.): Transfer data on cluster to workDir

- Log on to Transfer node (xfer.gacrc.uga.edu)
  - Mac/Linux: ssh MyID@xfer.gacrc.uga.edu (page 15-16)
  - ✓ Windows: use PuTTY to log in MyID@xfer.gacrc.uga.edu (page 17-19)
- Landing folder: /home/MyID (Home)
- You can transfer data between following directories on cluster using cp or mv:
  - 1. /home/MyID (Home)
  - 2. /scratch/MyID (Scratch)
  - 3. /work/abclab (Work)
  - 4. /project/abclab (Project)
- Most file systems on Transfer are *auto-mounted* upon *the first time full-path access*, e.g., cd /project/abclab/

#### Step6: Make a job submission script in workDir

https://wiki.gacrc.uga.edu/wiki/Sample batch job submission scripts on Sapelo2

| GNU nano 2.3.1 Fi  | le: sub.sh   | Modified   | Georgia Advanced Computing<br>Resource Center |
|--|--|--|---|
| <pre>#!/bin/bash<br/>#SBATCHjob-name=testBowtie2<br/>#SBATCHpartition=batch<br/>#SBATCHntasks=1<br/>#SBATCHmem=4G<br/>#SBATCHtime=1:00:00<br/>#SBATCHexport=NONE<br/>#SBATCHexport=NONE<br/>#SBATCHoutput=%x_%j.out<br/>#SBATCHoutput=%x_%j.out<br/>#SBATCHmail-type=END,FAIL<br/>#SBATCHmail-type=END,FAIL<br/>#SBATCHmail-user=username@uga.edu<br/>cd \$SLURM_SUBMIT_DIR<br/>ml Bowtie2/2.4.1-GCC-8.3.0</pre> | <pre># Job name (testBowtie2)<br/># Queue name (batch)<br/># Run single task using one CPU core<br/># Job memory limit (4 GB)<br/># Time limit hrs:min:sec or days-hou<br/># Do not load any users' explicit er<br/># Standard output, testBowtie2_1234.<br/># Standard error log, testBowtie2_124.<br/># Standard error log, testBowtie2_12<br/># Mail events (BEGIN, END, FAIL, ALL<br/># Where to send mail<br/># Change directory to job submission<br/># Load software module and run bowt:</pre> | e on a single node<br>urs:minutes:seconds<br>nvironment variables<br>.out<br>234.err<br>L)<br>n directory<br>ie2 below | UNIVERSITY OF GEORGIA                         |
|  |  |  |   |
| <pre>^G Get Help</pre>   | d File <mark>^Y</mark> Prev Page <mark>^K</mark> Cut Text<br>re Is <mark>^V</mark> Next Page <mark>^U</mark> UnCut Tex   | To run the demo example<br>these files into your work  | , please copy<br>ing dir:                     |
|  |  | cp -r /usr/local/trainin   | g/Sapelo2/* .                                 |

#### Step7: Submit a job from workDir using sbatch

https://wiki.gacrc.uga.edu/wiki/Running Jobs on Sapelo2#How to submit a job to the batch partition

zhuofei@ss-sub1 workDir\$ pwd /scratch/zhuofei/workDir zhuofei@ss-sub1 workDir\$ ls index myreads.fq sub.sh zhuofei@ss-sub1 workDir\$ sbatch sub.sh Submitted batch job 32860

sub.sh is a job submission script to

- 1. specify computing resources:
- 2. load software using module load
- 3. run any Linux commands you want to run
- 4. run the software

#### Step8: Check job status using squeue --me

https://wiki.gacrc.uga.edu/wiki/Monitoring Jobs on Sapelo2

| zhuofe | ei@ss-sub1 | workDir\$ | squeue  | ·me |      |       |                   |
|--------|------------|-----------|---------|-----|------|-------|-------------------|
| JOBID  | PARTITION  | NAME      | USER    | ST  | TIME | NODES | NODELIST (REASON) |
| 32862  | batch      | testBowt  | zhuofei | PD  | 0:00 | 1     | (None)            |
| 32861  | batch      | testBowt  | zhuofei | R   | 0:05 | 1     | c5-19             |
| 32860  | batch      | testBowt  | zhuofei | R   | 4:37 | 1     | c5-19             |
| 32859  | batch      | testBowt  | zhuofei | CD  | 9:29 | 1     | b1-2              |

R : job is Running
PD : job is PenDing, waiting for resources to become available
CD : job is CompleteD and is not longer running
CA : job is CAnceled and is not longer running
F : job is Failed (crashed) on the node and is not longer running

Note: "TIME" is the elapsed wall-clock time of your job running on cluster, instead of the CPU time.

## Step8: Check job status using squeue --me -l

https://wiki.gacrc.uga.edu/wiki/Monitoring Jobs on Sapelo2

| zhuofei@s | zhuofei@ss-subl workDir\$ <mark>squeueme -l</mark> |           |         |         |      |           |            |                |
|-----------|--|-----------|---------|---------|------|-----------|------------|----------------|
| Tue Sep 1 | .5 15 <b>:</b> 00                                  | ):51 2020 |         |         |      |           |            |                |
| JOBID PAR | TITION   | NAME      | USER    | STATE   | TIME | TIME_LIMI | NODES NODE | CLIST (REASON) |
| 32866     | batch  | testBowt  | zhuofei | RUNNING | 0:14 | 1:00:00   | 1 rc6-     | -10            |
| 32865     | batch  | testBowt  | zhuofei | RUNNING | 0:30 | 1:00:00   | 1 rc6-     | -10            |
| 32864     | batch  | testBowt  | zhuofei | RUNNING | 0:33 | 1:00:00   | 1 rc6-     | -10            |

## Step8 (Cont.): Cancel job using scancel

https://wiki.gacrc.uga.edu/wiki/Running Jobs on Sapelo2#How to cancel .28delete.29 a running or pending job

| zhuofei@ss-sub1  | workDir\$ | squeue    | -me -l   |
|------------------|-----------|-----------|----------|
| Tue Sep 15 15:08 | 8:27 2020 |           |          |

## Obtain Job Details

https://wiki.gacrc.uga.edu/wiki/Running Jobs on Sapelo2#How to check resource utilization of a running or finished job

Option 1: squeue --me for details of a pending or running jobs

Option 2: sacct or sacct-gacrc (-v) for details of computing resource usage of

a <u>running or finished</u> job

Option 3: seff for details of computing resource usage of a <u>finished</u> job

Option 4: Email notification from finished jobs (completed, canceled, or crashed), if using:

```
#SBATCH --mail-user=username@uga.edu
```

```
#SBATCH --mail-type=ALL
```

#### GACRC Help and Support https://wiki.gacrc.uga.edu/wiki/Getting Help

#### Job Troubleshooting:

Please tell us details of your question or problem, including but not limited to:

- ✓ Your user name
- ✓ Your job ID
- ✓ Your working directory
- $\checkmark$  The queue name and command you used to submit the job

#### Software Installation:

- ✓ Specific name and version of the software
- ✓ Download website
- ✓ Supporting package information if have

When you ask GACRC to test or troubleshoot your jobs, Please make sure of the correctness of your datasets being used!

#### GACRC Service Catalog

Georgia Advanced Computing Resource Center (GACRC) service catalog

#### Services (11)

#### Account Creation

For a research group's PI to request user accounts for group members on the GACRC computing systems.

#### **Class Account Creation**

For an instructor to request user accounts for students attending a course that will need to use GACRC computing systems.

#### **Class Account Modification**

For instructors to request changes to be made in previously requested class account.

#### Computing Lab Modification/Deletion

#### General Internal

General Support

Report issues and request help with GACRC systems, except for software installation requests and account/lab creation requests.

Lab Creation For a research group's PI to register a computing lab on the GACRC computing systems

#### Modify/Delete Account

For PIs to request changes in or deletion of user accounts on GACRC computing systems.

#### Software Installation/Update

Request software and common application database (e.g. NCBI blast databases) installation and upgrade.

My Recent Requests

## Slurm job states

| Code | State      | Meaning                                  |
|------|------------|--|
| R    | Running    | Job is running on compute node(s)        |
| PD   | Pending    | Job is waiting for compute node(s)       |
| CD   | Completed  | Job completed                            |
| CG   | Completing | Job is completing                        |
| CA   | Canceled   | Job was canceled                         |
| F    | Failed     | Job terminated with non-zero exit code   |
| NF   | Node Fail  | Job terminated due to failure of node(s) |

## Commands for submitting and canceling jobs

| Description                                       | Slurm Command                               |
|---|---|
| Submit a batch job to queue                       | sbatch sub.sh                               |
| Delete a job from queue                           | scancel <jobid></jobid>                     |
| Cancel all your job(s)                            | scancel -u <username></username>            |
| Cancel all your pending job(s)                    | scancel -t PENDING -u <username></username> |
| Cancel your job(s) by job name                    | scancelname <jobname></jobname>             |
| Cancel an element (index) of an array job (jobID) | scancel <jobid>_<index></index></jobid>     |

## Commands for monitoring jobs

| Description                      | Slurm Command   |
|----------------------------------|---|
| Command                          | squeue or squeue -l   |
| Job status of all your jobs      | squeueme or squeueme -l   |
| Job status of a job              | squeue -j <jobid></jobid>   |
| Job status of job(s) from a user | squeue -u <username></username>   |
| Job status with details          | scontrol show job <job id=""><br/>scontrol show job -dd <job id=""></job></job> |
| Job's resource usage             | sacct-gacrc   |
| View job batch script            | <pre>scontrol write batch_script <job id=""> [filename]</job></pre>             |

## Slurm headers for running a Serial (single-core) job

https://wiki.gacrc.uga.edu/wiki/Sample\_batch\_job\_submission\_scripts\_on\_Sapelo2

# #!/bin/bash #SBATCH --job-name=testBowtie2 #SBATCH --partition=batch #SBATCH --ntasks=1 #SBATCH --mem=4G #SBATCH --time=1:00:00 #SBATCH --export=NONE #SBATCH --output=%x\_%j.out #SBATCH --error=%x %j.err

#SBATCH --mail-type=END,FAIL #SBATCH --mail-user=username@uga.edu

# Job name (testBowtie2)

# Queue name (batch)

# Run in a single task using one CPU core on a single node# Job memory limit (4 GB)

# Time limit hrs:min:sec or days-hours:minutes:seconds

# Do not load any users' explicit environment variables

# Standard output log, e.g., testBowtie2\_1234.out

# Standard error log, e.g., testBowtie2\_1234.err

# Mail events (BEGIN, END, FAIL, ALL)

# Where to send mail

- # Time limit hrs:min:sec or days-hours:minutes:seconds
  # Do not load any users' explicit environment variables
  # Standard output log, e.g., testBowtie2Array\_1234.out
  # Standard error log, e.g., testBowtie2Array\_1234.err
  # Array element range from 0 to 9, i.e. 10 element jobs

cd \$SLURM\_SUBMIT\_DIR ml Bowtie2/2.4.1-GCC-8.3.0 # Original data is split into 10 pieces and run in each element job bowtie2 -x ./index/lambda\_virus -U ./myreads\_\$SLURM\_ARRAY\_TASK\_ID.fq \

-S output\_\$SLURM\_ARRAY\_TASK\_ID.sam

## Slurm headers for running a Threaded (OpenMP) job

#!/bin/bash #SBATCH -- job-name=testOpenMP **#SBATCH** --partition=batch #SBATCH --nodes=1 **#SBATCH** --ntasks=1 **#SBATCH** --cpus-per-task=12 **#SBATCH** --mem=10G **#SBATCH** --export=NONE #SBATCH --time=24:00:00 #SBATCH --output=%x %j.log **#SBATCH** --mail-type=END,FAIL #SBATCH --mail-user=username@uga.edu

# Job name (testOpenMP) # Queue name (batch) # Run all processes on a single node # Run in a single task on a single node # Number of CPU cores per task (12) # Job memory limit (10 GB) # Do not load any users' explicit environment variables # Time limit hrs:min:sec or days-hours:minutes:seconds # Standard output and error log, e.g., testOpenMP\_1234.log # Mail events (BEGIN, END, FAIL, ALL) # Where to send mail

export OMP\_NUM\_THREADS=\$SLURM\_CPUS\_PER\_TASK # Sets the number of threads to use for OpenMP parallel regions ml foss/2019b # Load toolchain module ./myProgram.x # Run your program binary compiled with OpenMP

cd \$SLURM\_SUBMIT\_DIR

#### Slurm headers for running an MPI job

#!/bin/bash

- #SBATCH --job-name=testMPI
- #SBATCH --partition=batch
- #SBATCH --nodes=2
- **#SBATCH** --ntasks-per-node=16
- #SBATCH --cpus-per-task=1
- #SBATCH --mem-per-cpu=500M
- #SBATCH --time=24:00:00
- #SBATCH --export=NONE
- #SBATCH --output=%x\_%j.log #SBATCH --mail-type=END,FAIL
- #SBATCH --mail-user=username@uga.edu

cd \$SLURM\_SUBMIT\_DIR ml foss/2019b mpirun -n 32 ./myProgram.x

- # Job name (tesMPI)
- # Queue name (batch)
- # Run on two nodes
- # How many tasks on each node; Number of tasks=32=MPI ranks
  # Number of CPU cores per task; 16 CPU cores per node
  # Memory per allocated CPU; 8GB (500MB\*16) memory per node
  # Time limit hrs:min:sec or days-hours:minutes:seconds
  # Do not load any users' explicit environment variables
  # Standard output and error log, e.g., testMPI\_1234.log
  # Mail events (BEGIN, END, FAIL, ALL)
  # Where to send mail

# Load toolchain module

# Run your program binary compiled with OpenMPI with 32 ranks

## Slurm headers for running a Hybrid MPI/OpenMP job

| #!/bin/bash                       |   |
|-----------------------------------|---|
| #SBATCHjob-name=testHybrid        | # Job name (testHybrid)                                     |
| #SBATCHpartition=batch            | # Queue name (batch)  |
| #SBATCHnodes=2                    | # Run on two nodes  |
| #SBATCHntasks-per-node=8          | # How many tasks on each node; Number of tasks=16=MPI ranks |
| #SBATCHcpus-per-task=4            | # Number of CPU cores per task; 32 CPU cores per node       |
| #SBATCHmem-per-cpu=500M           | # Memory per allocated CPU; 16GB (500MB*32) memory per node |
| #SBATCHtime=24:00:00              | # Time limit hrs:min:sec or days-hours:minutes:seconds      |
| #SBATCHexport=NONE                | # Do not load any users' explicit environment variables     |
| #SBATCHoutput=%x_%j.log           | # Standard output and error log                             |
| #SBATCHmail-type=END,FAIL         | # Mail events (BEGIN, END, FAIL, ALL)                       |
| #SBATCHmail-user=username@uga.edu | # Where to send mail  |

cd \$SLURM\_SUBMIT\_DIR# Change directory to job submission directoryexport OMP\_NUM\_THREADS=\$SLURM\_CPUS\_PER\_TASK# Sets the number of threads to use for OpenMP parallel regionsml foss/2019b# Load toolchain modulempirun -n 16 ./myProgram.x# Run your program binary compiled with OpenMPI with 16 ranks

## Slurm headers for running a GPU job

#!/bin/bash **#SBATCH** --job-name=amber #SBATCH --partition=gpu\_p **#SBATCH** --gres=gpu:1 **#SBATCH** --ntasks=1 **#SBATCH** --cpus-per-task=2 #SBATCH --mem=40gb #SBATCH --time=10:00:00 **#SBATCH** --export=NONE #SBATCH --output=%x %j.out **#SBATCH** --mail-type=END,FAIL #SBATCH --mail-user=username@uga.edu

# Job name # Partition (queue) name, i.e., gpu p # Requests one GPU device; --gres=gpu:P100:1, --gres=gpu:K40:1 # Run a single task # Number of CPU cores per task # Job memory request # Time limit hrs:min:sec # Do not load any users' explicit environment variables # Standard output and error log, e.g., amber\_1234.out # Mail events (BEGIN, END, FAIL, ALL) # Where to send mail

cd \$SLURM\_SUBMIT\_DIR ml Amber/18-fosscuda-2018b-AmberTools-18-patchlevel-10-8 mpiexec \$AMBERHOME/bin/pmemd.cuda -O -i ./prod.in -o prod\_c4-23.out -p ./dimerFBP\_GOL.prmtop -c ./restart.rst \ -r prod.rst -x prod.mdcrd

## Slurm headers for running a Singularity container

#!/bin/bash

**#SBATCH** -- job-name=test\_sortmerna **#SBATCH** --partition=batch #SBATCH --ntasks=1 #SBATCH --mem=8gb #SBATCH --time=02:00:00 **#SBATCH** --export=NONE **#SBATCH** --output=sortmerna.%j.out **#SBATCH** --error=sortmerna.%j.err **#SBATCH** --cpus-per-task=4 **#SBATCH** --mail-type=END,FAIL #SBATCH --mail-user=username@uga.edu

# Job name # Partition (queue) name # Run on a single CPU # Job memory request # Time limit hrs:min:sec # Do not load any users' explicit environment variables # Standard output log, e.g., sortmerna.1234.out # Standard error log, e.g., sortmerna.1234.err # Number of CPU cores per task # Mail events (NONE, BEGIN, END, FAIL, ALL) # Where to send mail

cd \$SLURM\_SUBMIT\_DIR

singularity exec /apps/singularity-images/sortmerna-3.0.3.simg sortmerna --threads 4 --ref db.fasta,db.idx --reads file.fa \ --aligned base\_name\_output

## Guideline Tips

- Do NOT use Login node to run CPU/memory intensive tasks directly  $\rightarrow$  submit jobs to compute nodes!
- Do NOT use Login Node to transfer data between your local computer and cluster → use Transfer node!
- Do NOT use Home for storing job data → use /scratch/MyID
- Do NOT park data in Scratch or Local Scratch → clean up when job finishes or exits from node
- Do NOT park data permanently in Project → download data to your local drive
- NO large memory job running on batch partition → use highmem\_p
- NO small memory job running on highmem\_p partition → use batch
- In general, <u>number of threads you want to run with a parallel job = number of cores requested</u>
- When you archive data using tar on /scratch, please do not use z option (compression option). After you achieved data by tar, you can use gzip to compress it.

## Practical Tips

 Each directory should not have too many files inside! A rule of thumb would be to try to keep no more than a few tens of thousands of files (<10000 would be even better) in any single directory which is accessed frequently

# Thank You!
